The IMS Bulletin
Vol.18, No.6, 1989, 584-601.

The IMS Bulletin: Volume 18 (1989)

Author Index to 387 Abstracts

208: Lexington (19-22 March 1989).....58
209: Davis (25-28 June 1989).....50
210: Wasington (6-10 August 1989).....152
211: Sheffield (16-19 August 1989).....56
212: Leuven (22-26 August 1989).....23
By Title.....48

Vol.18, No.1.....pp. 1-112
Vol.18, No.2.....113-216
Vol.18, No.3.....217-360
Vol.18, No.4...361-424
Vol.18, No.5...425-512
Vol.18, No.6...513-604

ABDOUS, B. and R. THEODORESCU.
On the strong uniform consistency of a new kernel density estimator, 89t-20 (p. 215).
On the L^1 strong consistency of a new kernel probability density estimator, 89t-24 (p. 358).
The spatial median revisited, 89t-29 (p. 359).

ABU-SALIH, MOHAMMAD S.
Estimation of $P(Y < X)$ when X and Y have independent different distributions, 208-49 (p. 46).

ADLER, ANDRÉ.
Exact sequences for sums of independent random variables, 208-53 (p. 48).
Generalized one-sided laws of the iterated logarithm for random variables barely with or without finite mean, 210-136 (p. 280).

ADLER, ANDRÉ, ANDREW ROSALSKY, and ROBERT L. TAYLOR.
Strong laws of large numbers for weighted sums of random elements in normed linear spaces, 211-48 (p. 306).

AHSANULLAH, MOHAMMED.
Upper and lower records of symmetric and mutually symmetric distributions, 212-15 (p. 319).

AHSANULLAH, M. and S.N.U.A. KIRMANI.
On lower record values from the exponential distribution, 208-15 (p. 37).

AKRITAS, MICHAEL G.
Robust m-estimation in the two-sample problem, 210-75 (p. 263).

ALAM, KHURSHEED and M. HASEEB RIZVI.
A selection procedure based on rank order statistics, 210-40 (p. 254).

ALAM, KHURSHEED and K. M. LAL SAXENA.
Majorization, alpha-majorization and diversity, 210-62 (p. 260).

ALBERT, JAMES H.
On the use of power transformations to simplify posterior distributions, 210-41 (p. 254).

ALDOUS, DAVID J.
Computer science applications of random walks on graphs, 211-1 (p. 294).

ALI, ABDUNNABI M. and A. K. MD. EHSANES SALEH.
Asymptotic theory of baseball data analysis, 208-24 (p. 39).

AMIN, ASHOK T. *see* SIEGRIST, KYLE T.

AMOLI, JAMSHID ETEZADI. Reduction in dimensionality of multivariate data by means of nonlinear factor analysis, 209-28 (p. 137).

ARAS, GIRISH.
Sequential estimation of the mean of a first-order autoregressive process, 210-63 (p. 260).

ARAS, GIRISH and LYN R. WHITAKER.
Sequential estimation of an age replacement policy, 210-103 (p. 271).

ARAS, GIRISH ARUN, S. RAO JAMMALAMADAKA, and X. ZHOU.
Limit distribution of spacings statistics when the sample size is random, 209-11 (p. 132).

ARAS, GIRISH *see also* WHITAKER, LYN R.

ALBERT, JAMES H.
On the use of power transformations to simplify posterior distributions, 210-41 (p. 254).

ALDOUS, DAVID J.
Computer science applications of random walks on graphs, 211-1 (p. 294).

ALI, ABDUNNABI M. and A. K. MD. EHSANES SALEH.
Asymptotic theory of baseball data analysis, 208-24 (p. 39).

AMIN, ASHOK T. *see* SIEGRIST, KYLE T.

AMOLI, JAMSHID ETEZADI. Reduction in dimensionality of multivariate data by means of nonlinear factor analysis, 209-28 (p. 137).

ARAS, GIRISH.
Sequential estimation of the mean of a first-order autoregressive process, 210-63 (p. 260).

ARAS, GIRISH and LYN R. WHITAKER.
Sequential estimation of an age replacement policy, 210-103 (p. 271).

ARAS, GIRISH ARUN, S. RAO JAMMALAMADAKA, and X. ZHOU.
Limit distribution of spacings statistics when the sample size is random, 209-11 (p. 132).

ARAS, GIRISH *see also* WHITAKER, LYN R.

ARCHAMBAULT, SYLVAIN *see* MOORE, MARC.
ARJAS, ELJA and P. HAARA.
Partial observations, partial model specification, and the structure of likelihood for point processes, 211-11 (p. 296).
ARORA, S., A. C. JULKA, and O. P. BAGAI.
Testing the significance of Gini-Lorenz ratio and a related measure of poverty, 89t-41 (p. 512).
ATHREYA, KRISHNA B. and A. WEERASINGHE.
Optimality of diffusions in a stochastic control problem, 210-149 (p. 416).

BACCELLI, FRANÇOIS, and SERGUEI FOSS.
Uniqueness and coupling properties of the stationary precedence-based queueing discipline, 211-45 (p. 305).
BAGAI, O. P. *see* ARORA, S.
BAILER, A. John *see* PIEGORSCH, WALTER W.
BALDING, DAVID.
Annihilating and coalescing particle systems: models of diffusion-limited reactions, 211-31 (p. 302).
BANDYOPADHYAY, DIPANKAR and ASIT P. BASU.
A class of tests for exponentiality against increasing failure rate alternatives, 208-12 (p. 36).
BANFIELD, JEFFREY D. and ADRIAN E. RAFTERY.
Ice floe identification in satellite images using mathematical morphology and clustering about principal curves, 89t-44 (p. 575).
BARRON, ANDREW R.
Minimum complexity density estimation, 208-32 (p. 42).
BARTH, M., J. L. DENNY, and T. A. GOOLEY.
Spatial dependence in Markov fields, 212-7 (p. 317).
BASAWA, ISHWAR V.
Resampling methods for dependent data, 211-38 (p. 304).
BASAWA, ISHWAR V., WILLIAM P. MCCORMICK, and T. N. SRIRAM.
Sequential estimation for dependent observations with an application to non-standard autoregressive processes, 208-30 (p. 41).
BASAWA, I. V. *see also* NICKERSON, DAVID M.; SRIRAM, T. N.
BASU, ASIT P. *see* BANDYOPADHYAY, DIPANKAR.
BECKER, NIELS G.
Analysis of infectious disease data from a sample of households, 211-12 (p. 297).
BERAN, JAN, FRANK HAMPEL, and HANS R. KÜNSCH.
Estimating contrasts, 209-35 (p. 139).
BERGER, JAMES O. and CHRISTIAN ROBERT.
Subjective hierarchical Bayes estimation of a normal mean: on the frequentist interface, 210-11 (p. 246).
BHANDARI, SUBIR KUMAR.
On optimum p-stage selection procedures, 89t-28 (p. 359).
BHAPKAR, VASANT P.
On partial sufficiency in the presence of nuisance parameters, 210-76 (p. 264).
BICKEL, PETER J., V. N. NAIR, and P. C. C. WANG.
Efficient estimation in sampling proportional to size without replacement with applications to some models for oil reserve estimation, 209-48 (p. 356).
BIGGINS, J. D.
Martingale convergence in branching random walks, 211-40 (p. 304).
BOLTHAUSEN, ERWIN.
On the diffusive behavior of directed polymers in random environments, 211-32 (p. 302).
BOROWIAK, DALE.
Nonlinear shrinkage estimation, 210-69 (p. 261).
BRADBURY, IAN.
A fast Fourier implementation of moment matching kernel smoothing for finite densities, 210-22 (p. 249).
BRADLEY, RICHARD C. On ρ-mixing except on small sets, 89t-5 (p. 112).

BRANSON, DAVID.
An urn model and the coalescent in neutral infinite-alleles genetic processes, 211-7 (p. 295).
BUNGE, JOHN A. and H. N. NAGARAJA.
The distributions of certain record statistics from a random number of observations, 211-21 (p. 299).
BUONACCORSI, JOHN P.
Adjusting for measurement error using calibration data, 210-77 (p. 264).
BURGOS, FERNANDO. Inferring that the selected population is the best in the unequal-scale-parameters case, 210-82 (p. 265).
BURMAN, PRABIR.
v-fold cross validation and repeated learning-testing methods, 209-10 (p. 131).
BURMAN, PRABIR and DEBORAH NOLAN.
Hybrid density estimators, 210-104 (p. 271).
BURROUGH, P. A. *see* HEUVELINK, G. B. M.

CAMBANIS, STAMATIS *see* WU, W.
CAMPBELL, GREGORY and MAKARAND V. RATNAPARKHI.
An application of Lomax distributions in receiver operating characteristic (ROC) curve analysis, 210-116 (p. 275).
CANNINGS, CHRIS and G. T. VICKERS.
Patterns of evolutionarily stable strategies, 211-41 (p. 304).
CARLSTEIN, EDWARD and CHARUMATHY KRISHNAMOORTHY.
A nonparametric estimator of boundaries: implementation and examples, 210-65 (p. 261).
CARLSTEIN, EDWARD *see also* KRISHNAMOORTHY, CHARUMATHY; WU, W.
CARMICHAEL, J. P., J. C. MASSÉ and R. THEODORESCU.
Reciprocal covariance solutions of some matrix differential equations, 89t-18 (p. 215).
CHAGANTY, N. R.
Strong moderate deviation theorems for *m*-dependent random variables: preliminary report, 211-47 (p. 306).
CHAKRABORTI, SUHABRATA and M. M. DESU.
Tests for comparing several treatments with a control under right-centering, 210-43 (p. 254).
CHAN, N. H. and L. T. TRAN.
On the first order autoregressive process with infinite variance, 89t-3 (p. 111).
CHAN, NGAI HANG and CHING-ZONG WEI.
Inference for nonstationary time series, 208-21 (p. 38).
CHANDA, KAMAL C.
Asymptotics of a class of nonlinear time series, 210-139 (p. 281).
CHANG, I-SHOU, C. H. CHEN, and CHAO A. HSIUNG.
Asymptotic inference for a change-point hazard rate model with random censorship, 210-45 (p. 255).
CHANG, I-SHOU and CHAO A. HSIUNG.
Time-sequential point estimation through estimating equations, 210-44 (p. 255).
CHANG, MYRON N. and P. V. RAO.
Berry-Esséen bound for the Kaplan-Meier estimator, 210-84 (p. 266).
CHANG, TED C.
Statistics of tectonic plate reconstructions, 212-8 (p. 318).
CHEN, C. H. *see* CHANG, I-SHOU.
CHEN, C. S. and T. H. SAVITS.
Optimal replacement for a general maintenance model, 89t-12 (p. 213).
CHEN, HUNG.
Efficient estimation in a partial spline model, 209-43 (p. 142).
CHEN, LI-SUE *see* HUANG, WEN-JANG.
CHEN, PINYUEN.
A composite stopping rule for multinomial subset selection, 208-4 (p. 34).
CHEN, SHANDE and GOVIND S. MUDHOLKAR.
A remark on testing significance of an observed correlation matrix, 89t-25 (p. 358).
Null distribution of the sum of squared *z*-transforms in testing complete independence, 210-131 (p. 278).

CHENG, KUANG FU *see* CHENG, PHILIP E.
CHENG, PHILIP E. and KUANG FU CHENG.
Asymptotic normality for robust R-estimates of regression functions, 209-49 (p. 356).
CHERNICK, MICHAEL R. and JON A. MAGNUSON.
An algorithm to detect specular occurrences in infrared sensor signatures based on influence functions, 210-30 (p. 251).
CHIU, SHEAN-TSONG.
On the asymptotic distributions of bandwidth estimates, 208-50 (p. 47).
CHOI, SUNGSUB.
Testing independence in Clayton's model with censored data, 208-13 (p. 36).
CHOULAKIAN, V., N. EL-JABI, and J. MOUSSI.
Duration series analysis of flood phenomena, 212-18 (p. 320).
CHUNG, YOUNSHIK *see* DEY, DIPAK K.
CHURCHILL, GARY A.
Compositional heterogeneity in DNA sequences, 209-3 (p. 129).
CLINE, DAREN B. H.
How well can you estimate a bad density?, 209-23 (p. 135).
CLYDE, MERLISE.
Pseudolikelihood estimation for spatial point processes, 210-115 (p. 274).
COHN, HARRY and OLLE NERMAN.
Weak ergodicity and products of random matrices, 89t-38 (p. 421).
COSTER, DANIEL C.
Trend-free run orders of mixed-level fractional factorial designs, 209-30 (p. 137).
COVER, THOMAS M.
Information theory and the stock market, 210-96 (p. 269).
COX, DENNIS D.
An analysis of Bayesian inference for nonparametric regression: pointwise confidence intervals, 208-35 (p. 43).
CRANK, KEITH N. *see* KUCZEK, THOMAS.
CROWELL, JOHN I. and PRANAB KUMAR SEN.
Sequential nonparametric estimation of the renewal function at a point, 210-46 (p. 255).
CZADO, CLAUDIA and THOMAS J. SANTNER.
Data selected transformations in binary regression models, 208-19 (p. 38).

DABROWSKA, DOROTA M.
Weak convergence of variable bandwidth conditional Kaplan-Meier estimator, 209-27 (p. 136).
DALY, FERGUS.
An urn model for the probability of a boy, 211-13 (p. 297).
DANIELS, HENRY E.
A look at perturbation approximations for epidemics, 211-52 (p. 307).
DARLING, R. W. R.
Products of infinite-dimensional random matrices related to particle systems, 211-2 (p. 294).
DAVID, HERBERT A.
The ASA archives at Iowa State University, 210-123 (p. 276).
DAVIS, M. H. A.
More on portfolio selection with transaction costs, 211-14 (p. 297).
DAWSON, DONALD A. *see* HOCHBERG, KENNETH J.
DE GUNST, MATHISCA.
Some asymptotic results for a non-Markovian point process with an application to plant cell population growth, 209-15 (p. 133).
DE HAAN, L.
Estimating the extreme-value index, 211-15 (p. 297).
DE LA PEÑA, VICTOR H., A. DVORETZKY, and Z. GOVINDARAJULU.
Bounds for second moment of randomly stopped sums of independent variables, 210-151 (p. 417).
DE LA PEÑA, VICTOR *see also* KLASS, MICHAEL J.
DE MESQUITA, A. R. *see* MORETTIN, P. A.

DEHLING, HEROLD and MURAD S. TAQQU.
U-statistics for long-range dependent observations, 211-33 (p. 302).
DEL PIÑO, GUIDO E.
On the existence of maximum likelihood estimators for log-linear models, 210-83 (p. 265).
DENNY, J. L. *see* BARTH, M.
DESHPANDE, JAYANT V.
A test for bivariate symmetry of dependent competing risks, 89t-26 (p. 358).
DESU, M. M.
Planning experiments for comparing treatments with a control, 210-105 (p. 271).
DESU, M. M. *see also* CHAKRABORTI, SUBHABRATA.
DEY, DIPAK K.
Estimation of parameters from multivariate life distributions, 210-98 (p. 270).
DEY, DIPAK K. and YOUNSHIK CHUNG
Simultaneous estimation of parameters from the compound power series distributions under normalized squared error loss, 89t-48 (p. 576).
DEY, DIPAK K. and PEI-SAN LIAO LIU.
Estimation of parameters and reliability from generalized life models, 89t-8 (p. 112).
On comparison of estimators in a generalized life model under several criteria, 89t-27 (p. 358).
DEY, DIPAK K. *see also* GELFAND, ALAN E., KUO, LYNN; RUKHIN, ANDREW L.
DIACONIS, PERSI *see* FILL, JAMES ALLEN.
DONNELLY, PETER J.
Weak convergence of ancestral processes in population genetics, 211-27 (p. 300).
DONOHO, DAVID.
Finding minimax linear estimates by the method of hardest subproblems, 208-27 (p. 40).
DUFFIE, DARRELL and LARRY EPSTEIN.
Continuous-time recursive utility, 211-35 (p. 303).
DURRETT, RICHARD.
Interacting particle systems inspired by biology, 211-24 (p. 300).
DÜRR, DETLEF.
On the diffusion of particles in simple fluids, 211-46 (p. 305).
DVORETZKY, A. *see* DE LA PEÑA, VICTOR H.

EATON, MORRIS L.
A statistical diptych: improper priors and admissible inferences – recurrence of symmetric Markov chains, 209-12 (p. 132).
EISENHART, CHURCHILL.
The library of the American Statistical Association, 210-122 (p. 276).
EL-JABI, N. *see* CHOULAKIAN, V.
ELLIS, STEVEN P. On the singularities of fitting planes to data, 209-32 (p. 138).
ELTINGE, JOHN L.
Estimation of fixed true values in the presence of serially correlated errors, 210-106 (p. 272).
EPSTEIN, LARRY *see* DUFFIE, DARRELL.
ERICKSEN, EUGENE P., JOSEPH B. KADANE, and JOHN W. TUKEY.
Adjusting the 1980 census of population and housing, 208-51 (p. 47).
ERVIN, V. J. *see* SAMBAMOORTHI, N.
ETHIER, S. N. *see* GRIFFITHS, R. C.
EUBANK, RANDALL L. and PAUL SPECKMAN.
A bias reduction theorem with applications in nonparametric regression, 210-73 (p. 263).
EUBANK, RANDALL L. and CLIFF H. SPIEGELMAN. Testing goodness-of-fit of a linear model via nonparametric regression of techniques, 210-47 (p. 256).
EUBANK, RANDALL L. *see also* ROSENSTEIN, REBECCA B.
EVANS, MICHAEL. Chaining via annealing, 208-5 (p. 34).

FABIAN, Václav.
On finite sample size behavior of asymptotically efficient estimates, 209-40 (p. 141).
FAKHRE-ZAKERI, ISSA.
Sequential confidence sets with guaranteed coverage probability and beta-protection, 210-128 (p. 278).

FARAWAY, JULIAN.
Bootstrap selection of bandwidth and confidence bands for nonparametric regression, 208-36 (p. 43).
FERNHOLZ, LUISA TURRIN.
Statistical functionals of smoothed empirical distribution functions, 210-48 (p. 256).
